

## **TechSolve Remote Work Best Practices FAQ**

### **Q: How can I optimize my remote work setup with TechSolve?**

A: Use a stable internet connection, enable two-factor authentication, and customize your dashboard for quick access to key tools. Schedule regular syncs to keep data current.

### **Q: What tools does TechSolve recommend for virtual meetings?**

A: TechSolve integrates with Zoom and Microsoft Teams for video calls. Use the in-app chat for quick check-ins and shared workspaces for meeting notes.

### **Q: How do I manage time zones across remote teams?**

A: Set your time zone in “Profile Settings” to display deadlines accurately. Use the scheduler to propose meeting times that align with team availability.

### **Q: Can I access TechSolve offline?**

A: Limited offline mode is available for viewing tasks and notes. Sync your device when online to update changes. Full features require an internet connection.

### **Q: What should I do if I encounter connectivity issues?**

A: Restart your router, switch to a wired connection if possible, or use a mobile hotspot. Contact support if issues persist beyond 24 hours.

### **Q: How does TechSolve support work-life balance remotely?**

A: Set “Do Not Disturb” hours in your profile to mute notifications. Use automation to handle routine tasks, freeing up personal time.
